Product Description

Dental Implant Prosthetic Universal Kit

- Made up of high quality medical grade stainless steel
 - One piece construction, well polished
 - Total 16 drivers compatible with different implant system
 - Torque wrench with torque values from 15-70Ncm
 - 135°C autoclavable
 - Color coded drivers for easy identification
- **Implant Prosthetic Kit** includes a complete set of components for tightening clinical and prosthetic screws to the correct torque value. This kit give clinicians the ability to handle any implant brand attachment. Save time and money by not having to order drivers from many different companies. The Universal Prosthetic Kit is composed of various prosthetic drivers that are compatible to different brands and sizes of implant abutments. A lever style torque wrench is included which is capable of measuring torque value from 15-70Ncm. Drivers can be easily grabbed and used by hand when needed. The color coding of the drivers makes the selection of the appropriate driver easy and intuitive.
 - **Indications:**
 - This Universal Prosthetic Kit is used when implanting a fixture in a place where a tooth is missing, or when connecting or detaching a cover screw or other upper structures.

This kit will cover all implant types

- Straumann
- Anthogyr
- Ankylo
- Roott
- Osstem
- Cortax
- Dentium
- Nobel
- biohorizon
